

Justin Chapon

4th year Engineering Student — Data Science, Management & Software Architecture

📍 Montpellier, France 📞 +33 7 82 22 25 37 ✉ justin.chapon@etu.umontpellier.fr
🏠 Justin Chapon 🌐 Letju

Objective

Seeking a 4-month internship (April–August 2026) in software engineering, including full-stack and general development projects.

Education

Selective Engineering School (3rd and 4th Year of a 5-Year engineering qualification) Specializing in Data Science, Software Architecture, and Management — Polytech Montpellier, France	2024 – present
Preparatory Classes Intensive curriculum in Mathematics, Physics and Software Engineering — Polytech Montpellier, France	2021 – 2024
High School Diploma with Honors Major in Physics & Mathematics — Victor Hugo High School, Lunel, France	2021

Technical Skills

Programming: Java, C, C#, Python, Swift, SQL, JavaScript, TypeScript, HTML, CSS
Web / Backend: Node.js, Express, Angular, PostgreSQL, REST APIs, cookies
Real-time & Networking: WebSockets, TCP, UDP, multithreading, processes
Tools & Platforms: Git (GitHub, GitLab), VS Code, IntelliJ IDEA, Unity
Cloud & Containerisation: Docker and AWS
Management: Agile / Scrum, accounting

Project Experience

Full Stack Web Project – 3D Multiplayer Game Technologies: JavaScript, HTML, CSS, Node.js, Express, PostgreSQL – Implemented WebSockets, cookies, and REST APIs for real-time interactions – Deployed full-stack application online with database, backend, and frontend – Developed a 3D multiplayer game with a procedurally generated infinite world – Stored dynamic world data in the database for persistent gameplay – Features include global chat, admin panel, and multiplayer mechanics	2025
Unity Project – Procedurally Generated Planet (<i>Self-taught</i>) Technologies: C#, Unity – Developed a complex procedurally generated planet system using Perlin Noise and a gravity system – Gained deep understanding of 3D concepts: triangles, normal vectors, lighting reflections – Implemented realistic water shaders using Unity's Shader Graph – Designed and optimized the planet generation system independently	2023

Work Experience

Team Member — Lidl, European retail supermarket (seasonal) — Grau-du-Roi, France Worked in a high-paced retail environment, developing teamwork, adaptability, and customer-facing skills.	2022
Intern — FISE (International Extreme Sports Festival) — Baillargues, France Gained experience in skatepark design using 3D modeling software, observed both workshop construction and event organization	2018

High-Level Athletics

Elite cyclist (High-Level Athlete Status) – developed discipline, resilience, and long-term goal management.
Competed internationally, including a World Cup event as part of the French national selection.

Soft Skills

Autonomy: Self-directed learning; delivered independent technical projects.
Problem-Solving: From concept to deployment (full-stack + multiplayer mechanics).
Teamwork & Leadership: Leadership experience from sports teams and scouting activities.
Time Management: Balance 15–20 h/week elite sports training with demanding engineering studies.

Languages

French: Native Speaker
English: Advanced (930/990 TOEIC)
